

IDEAS

2023 Bushfires

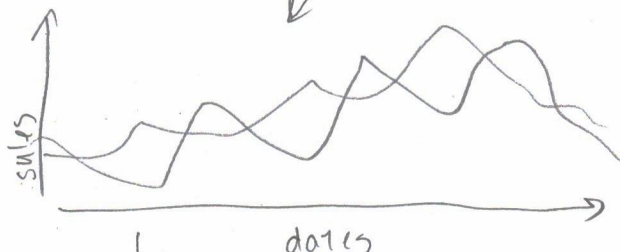

← dot density longitude + latitude
↳ overlapping points?

Bin map: too simple? Chloropleth
may not be feasible

Medicine prescriptions + sales:

← might get messy cuz lots of dates

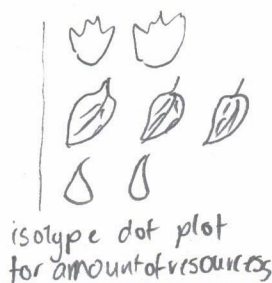

↳ line chart might show trends clearer

OR

discrete values might be more informative

isotype dot plot for amount of resources

FILTER

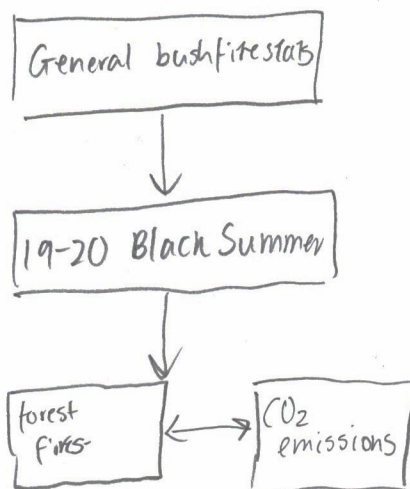

Pie chart,
↳ too simple
↳ bar chart represents no. deaths better

Hex bin,
↳ may not be feasible in vegalite because there's no hex mark

CATEGORISE

COMBINE & REFINÉ

1. may need 2 line charts for the 2 med types → butterfly chart?
2. Combine chloropleth & bin? → prob won't work

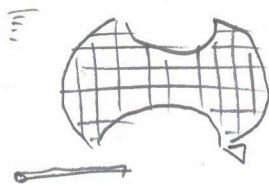

QUESTIONS

1. feasible to implement these visualisations?
2. Is the story cohesive enough?
3. Enough diversity in idioms?

LAYOUT

BUSHFIRES IN AUSTRALIA

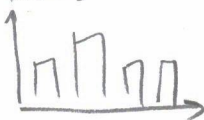

2023 BUSHFIRES

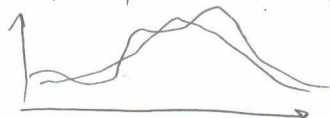

BLACK SUMMER 2020-2019

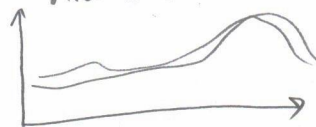

Deaths

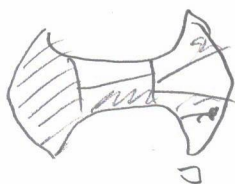

Med prescriptions

Med sales

Forest Area Burned

← may not be feasible with current dataset

Title: Bushfires in Australia
Author: Bowen Dong
Date: 7/9/2024
Sheet: 2
Task: Polaris 2.

OPERATIONS

Tooltip on hover:

State:

% rate change:

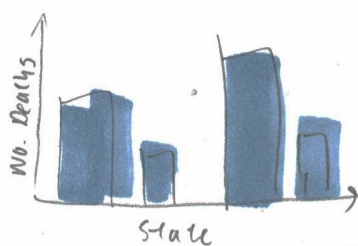

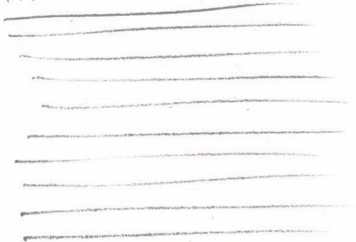

- highlight Black Summer period?

- annotate peaks in line graphs

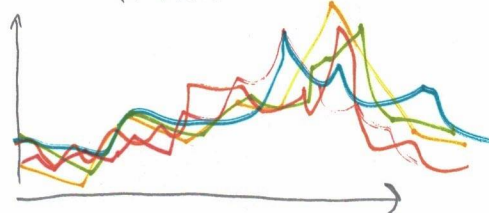

FOCUS

BLACK SUMMER 2019-2020

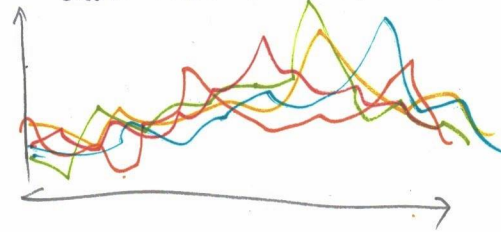

Text

Rate change in Prescription in Waters

Rate change in shortness of Breach medication sales

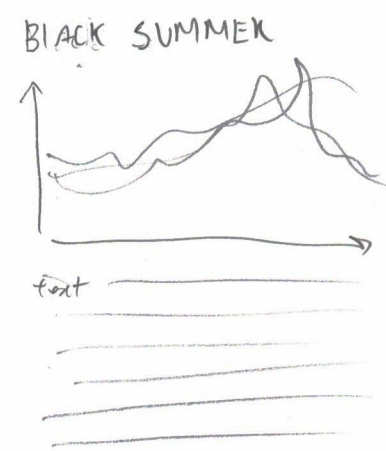

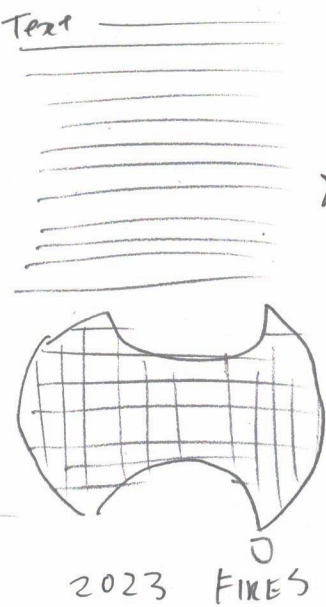

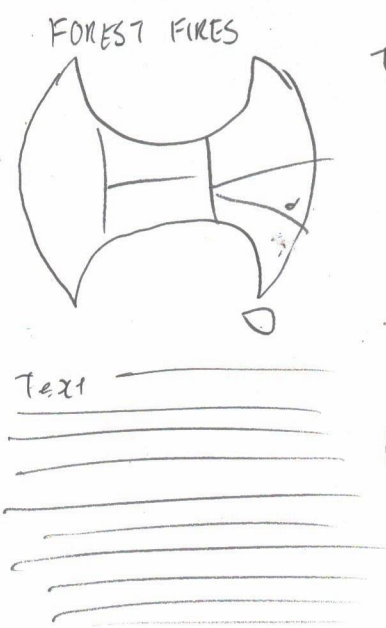

DISCUSSION

- may be too cluttered
- needs annotations
- sight lines make sense relatively
- need to make sure no colour overlap

LAYOUT

BUSHFIRES IN AUSTRALIA

Title: Bushfires in Australia
Author: Bowen Dong
Date: 7/9/2024
Sheet: 3
Task: Data Vis 2

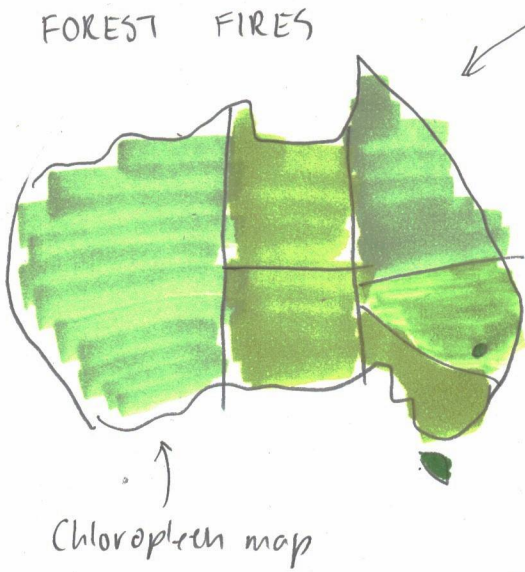

OPERATIONS

Tooltip on hover:

State:
% forest land burnt:

FOCUS

Legend:

Text

DISCUSSION

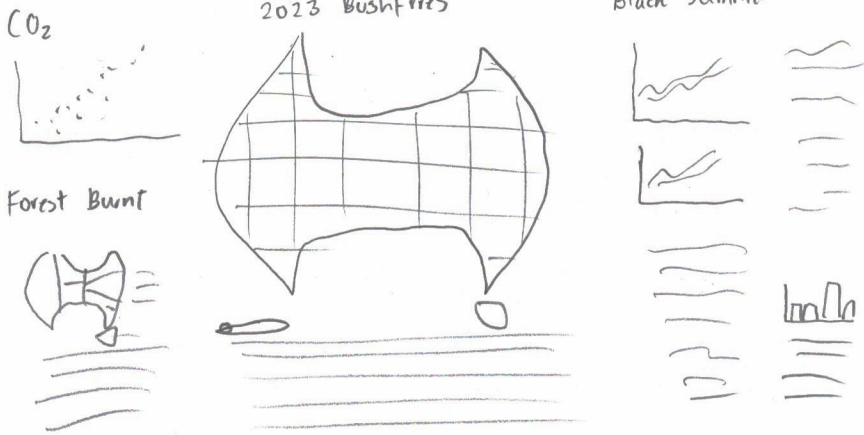

green might be too 'happy' of a colour for what the chart is describing.

↳ Oranges?

↳ overlaps with bin chart

↳ Brown?

Bushfires in Australia

OPERATIONS

- Hover on centre map to show tool tip:

Longitude:
 Latitude:
 FRP:

- use slider for date?
 or to show minimum fire to account?

FOCUS

Legend:

Lot's of invalid date cells in dataset so may not be feasible

DISCUSSION

- horizontal layout may not fit width of screen.
 ↳ charts on the side might get too squished

DEATHS

FOREST AREA BURNT

text

Title: Bushfires in Australia
Author: Bowen Dong
Date: 8/9/2024
Sheet: 5
Task: Data Vis 2.

OPERATIONS

Slider for minimum FRP

- clicking + hovering to show tooltips
→ see other design sheets

- toggling states for line charts?

FOCUS

- Focus on bin map so placed at top
→ may enlarge if screen proportions allow
- Will add annotations for better story telling
- changed from green to brown for 'Forest Area Burnt' chloropleth

DETAIL

- will need to wrangle data for almost every chart
- CO₂ emission scatterplot not feasible so removed
